

# INTRINSICS® ORGANICS

## About Our Organic Cotton Products

Intrinsics is thrilled to introduce a new concept in clean, natural cotton disposables: **Organic Cotton**. Our 100% cotton coil, wipes, balls, and rolls are made from 100% organic cotton – grown without the use of toxic and persistent pesticides or fertilizers, sewage sludge, irradiation, or genetic engineering.<sup>1</sup>

Through the use of organically-produced cotton, we are proud to be a part of an industry that seeks to build up the **quality** of the soil that our cotton is farmed in – soil whose organic matter content is increased through **natural** practices, in turn increasing its water-retaining ability and resulting in stronger plants. With healthier soil, there is less water runoff (and waste), and what remains is **not polluted** with pesticides or synthetic fertilizers.<sup>2</sup>

- No genetically-modified organism (GMO) seeds
- Strong, healthy soil content through crop rotation and increased organic matter
- Physical removal of pests, rather than chemical pesticides
- Maintains a better balance between pests and natural predators by using beneficial insects, biological and cultural practices to control pests<sup>3</sup>

Look for the seal of Intrinsics Organics: the only single-use organic cotton essentials you can rely on for the finest quality and performance.

## INTRINSICS ORGANICS -- coming in early 2007!

- 2x2 wipes (4-ply 200-ct.)
- 3x3 wipes (4-ply 200-ct.)
