Introducing The Provoderm™ Advantage

Richmond Dental & Medical introduces Provoderm™. Scientists spent more than 12 years developing this World Class formula. Provoderm focuses on how to keep skin healthy while at the same time preventing germs from colonizing on the skin. Nouristrat™ technology deeply cleans and disinfects the skin, preparing the surface for a patented protective platform that is bonded to the skin's cells, protecting the acid mantle and keeping the skin safe. Nourishing vitamins are then delivered to the emerging skin, while a defensive layer is formed above the protective platform, away from the cleaned and nourished skin. This layer of detergents creates a hostile environment, inhibiting bacterial growth. Provoderm is designed to be used three times a day or as needed. Follow normal hand washing procedures between applications. Product is available in a pump and tube.
