SUSTAINABILITY COMPARISON

CELLULOSE SPONGES	SEA SPONGES	SYNTHETIC SPONGES
<ul style="list-style-type: none"> All of our sponges are made from 100% natural untreated cellulose fiber, 23% of which is recycled paper. 	<p>Sea sponges are also natural, but there is some question as to the sustainability of the world's sponge fisheries.</p>	<p>Synthetic sponges are processed using various chemical agents and their manufacture includes the use of hydrocarbons and polyurethane, which can emit formaldehyde.</p>
<ul style="list-style-type: none"> Made in an ISO 14001-2004 compliant facility. 	<p>Some scientists believe that sea sponges could provide medicinal value but shrinking populations can push them to extinction.</p>	
<ul style="list-style-type: none"> After their useful life, they can be returned to the soil or sent home with clients. 	<p>Sea sponges also serve as a food source for sea turtles, including the endangered hawksbill.</p>	
<ul style="list-style-type: none"> Fully biodegradable and compostable!
